

Westfield Academy - Curriculum Information

The intent for A-Level Psychology focuses on equipping students with both a deep understanding of psychological concepts and the critical thinking skills needed to analyse human behaviour scientifically. We strive to foster critical thinking, and encourage the application of psychological knowledge to real-world contexts. We believe that students will leave with a strong foundation in psychology, valuable transferable skills, and an informed appreciation for ethical research practices.

PSYCHOLOGY

Head of Department	Ms Choudhury	
Head of Department email	sch@westfield.academy	
Lessons per 2 week cycle	10 lessons

Homework requirements	Up to 1 hour of homework will be set after each lesson. This will take place in the form of pre-reading materials, essay writing, research, revision and consolidation.								
Personal Development Links	Resilience and Stress Management: Given the challenges in psychology studies and future clinical roles, resilience-building is key. Interpersonal and Communication Skills: Psychology work involves active listening, empathy, and effective communication. Reflective Practice: Reflection on personal growth and academic progress is essential for psychology students to integrate theory with self-awareness. Ethical Awareness and Professional Boundaries: Understanding ethics and developing the ability to set boundaries are critical in psychology. Academic Growth and Research Skills: Skills in critical thinking, research methodology, and analysis are core in psychology. By actively cultivating these skills and using targeted resources, psychology students can strengthen both their personal and professional development paths.								
Trips/Visits (If applicable)	In either Yr12 or Yr13: - Freud's Museum, London								

	- The Clink Prison Museum, London
